Opisy Investzoom Poland – a leading reputable foreign direct investment consulting company in Poland is urgently seeking commission based representatives in the EU and North America. Our goal is to establish long term cooperation with people having continuous contact with the entrepreneurial environment in their own countries (such as business and management consultants, trainers, brokers, sales agents, franchisors and franchisees, solicitors, real estate agents, insurance agents, freelancers, project managers etc.) The role of our partners will be to familiarize their contractors with investment, business relocation or expansion opportunities in Poland. We are not simply acting as an investment opportunity advertising board. We actually take our great care of any investment approach, providing due diligence and presenting all important factors in the form of feasibility study, relating to any specific foreign client’s requirements. This partnership proposal is commission based at the rate of 1 %. We provide for both sides of investment proposals: Greenfield and running manufacturing plants for sale in Poland. The average value of each project is between 100 000,00 and 5 000 000,00 Euro. During the preparation of an investment proposal, we examine the vendor legal and financial status as well as analysing their financial forecasts and appropriate capital influx requirements. Any form of cooperation is welcome. You and your partners receive great benefits from Poland’s economic growth, when you engage our professional assistance in any investment approach.
